STATEMENT of WORK
for the
U. S. FOREST SERVICE

The National Forest Service at Helena, Montana will provide the USEPA with recommendations for plans and specifications for the reconstruction and maintenance of the Lewis and Clark County and Helena National Forest roads. The reconstruction and maintenance shall take place from U.S. Highway 12 to the Luttrell Pit.

The Ten Mile Road, from U.S. Hwy 12 to the bridge in Section #5 south of Rimini, would be used for access to the project area by construction equipment and construction workers. This road would need some light maintenance and dust abatement.

That part of the Ten Mile Road above the bridge in Section #5 and the Banner Creek Road will be used for access to the project area and for hauling waste material from the abandoned mines to the Luttrell Pit. These roads will need to be reconstructed to accommodate the haul traffic and shall be maintained during the life of the project.

The determination of the safety of the bridges on the county portion of the road (including the bridge in Section #5 south of Rimini) will be performed by others and not by the USFS.

The USFS will coordinate with Lewis and Clark County and the city of Helena on the road design. The USFS will also obtain all necessary access agreements, easements, and/or right of ways needed for the use of the roads.

The USFS shall submit interim project reports detailing the progress to date as well as a final project report. The frequency of the interim reports shall be determined and agreed to by the On Scene Coordinator and the Civil Engineer representing the USFS. These reports will be distributed to the EPA Project Manager and all other interested parties.

27. General Conditions

The other agency covenants and agrees that it will expeditiously initiate and complete the project for which funds have been awarded under this agreement.

28. Special Conditions

TERMS AND CONDITIONS

1. The recipient certifies (1) that any indirect costs included in billing EPA represent, in accordance with GAO principles, indirect cost that are funded out of the performing agency's currently available appropriations and that bear a significant relationship to the performing of the services of work, or (2) that statutory authority exists for charging other than these costs of performance. If an audit determines that any direct or indirect costs changed following the resolution of the audit and EPA will be credited for those costs.
2. The recipient agrees to submit a report to EPA showing the total amount of procurement dollars awarded and the amount and percentage of such funds awarded to MBEs and WBEs on Form 6005-3 and 6005-3a by December 15th of the current year. Reports should be submitted to:

Part V - Offer and Acceptance

- NOTE:**
- 1) For Funds-Out actions, the agreement/amendment must be signed by the other agency official in duplicate and one original returned to the Grants Administration Division for Headquarters agreements or to the appropriate EPA Regional IAG administration office within 3 calendar weeks after receipt or within any extension of time as may be granted by the EPA. The agreement/amendment must be forwarded to the address cited in item 29 after acceptance signature. Receipt of a written refusal or failure to return the properly executed document within the prescribed time may result in the withdrawal of the offer by EPA. Any change to the agreement by the other agency subsequent to the document being signed by the EPA Action Official, which the Action Official determines to materially alter the agreement/amendment, shall void the agreement/amendment.
 - 2) For Funds-In actions, the other agency will initiate the action and forward two original agreements/amendments to the appropriate EPA program office for signature. The agreements/amendments will then be forwarded to the appropriate EPA IAG administration office for acceptance signature on behalf of the EPA. One original copy will be returned to the other agency after acceptance.

SCOPE of WORK
for
THE UNITED STATES GEOLOGICAL SURVEY

The USGS will provide timely technical assistance to the responsible EPA official or On-Scene-Coordinator (OSC) for emergency response and time critical removal investigations and analyses.

The USGS will utilize its resources in providing geological services to the USEPA. It will review, analyze, and evaluate information obtained by itself as well as supplied by others in such disciplines as geology, hydrogeology, hydrology, geophysics, and water quality.

As requested by the USEPA, it will provide evaluations of data on seismicity, fracture flow pathways, geologic mapping, remote sensing, and other methods in determining the geologic risk involved at various clean-up sites.

The USGS will also provide other technical support for proposed removal actions as agreed upon by the agencies.

For each project authorized by this IAG the USGS shall submit interim project reports detailing the progress to date as well as a final project report. The frequency of the interim reports shall be determined and agreed to by the On Scene Coordinator and the Project engineer representing the USGS. These reports will be distributed to the EPA Project Manager and all other interested parties.
